- Section 1 - Primary Requirement: Client Plans
- Section 2 - Primary Requirement: Quote processing
- Section 3 - Primary Requirement: Indirect Accounts
- Section 4 - Secondary Requirements
- Q&A

Introduction

Subtitle placeholder

Who Am I?

Your bio/introduction, elaborate on your experience and skill sets that will benefit the client stakeholder responsible for the solution you are proposing.

Solution Context

Subtitle placeholder

Case

In your own words summarize the case and problem you are solving to ensure you understand the client stakeholder needs.

Primary Requirements

Subtitle placeholder

Client Plans

Describe the problem and the approach you are taking to solve the problem

- What are the main options with their pros and cons
- What is your recommendation
- Include specific details of the solution so you can prove your knowledge of the area (include config parameters including the how and why).

Quote Processing

Describe the problem and the approach you are taking to solve the problem

- What are the main options with their pros and cons
- What is your recommendation
- Include specific details of the solution so you can prove your knowledge of the area (include config parameters including the how and why.

Indirect Accounts

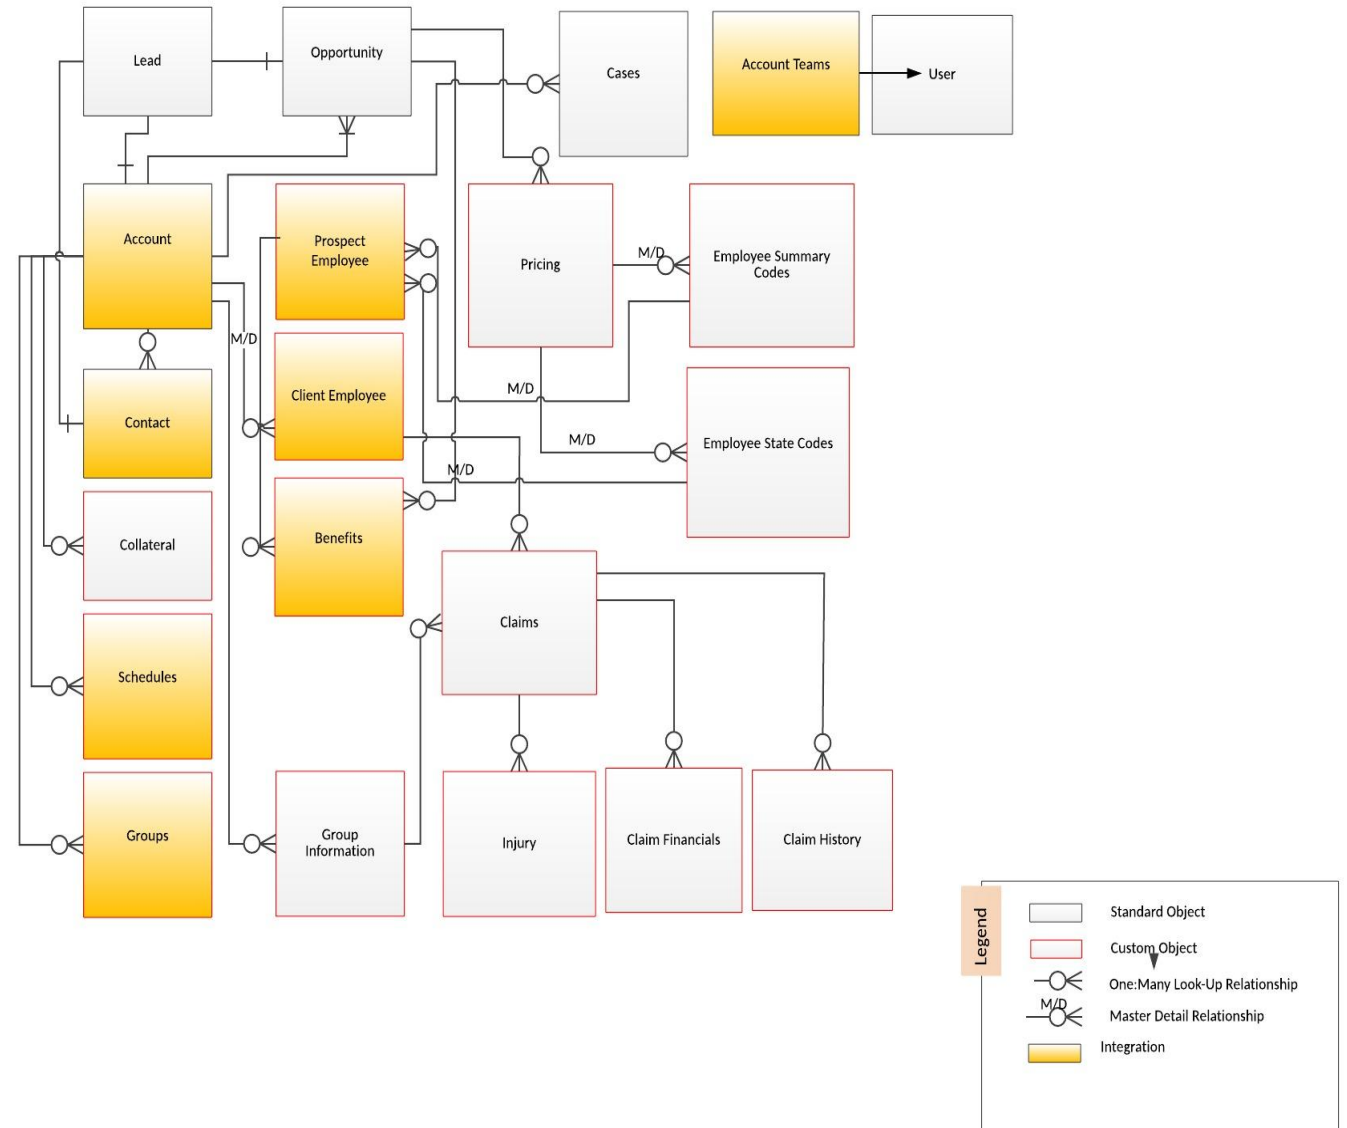

Describe the problem and the approach you are taking to solve the problem

- What are the main options with their pros and cons
- What is your recommendation
- Include specific details of the solution so you can prove your knowledge of the area (include config parameters including the how and why.

<Optional Data Model>

Note: this is **fully optional** for the candidate. If you believe a high level (potentially partial) data model helps to convey the context and assumptions you made for your solution include it here.

Secondary Requirements

Subtitle placeholder

Secondary Requirements

Describe the problem and the approach you are taking to solve these asks:

- Ideas Approval
- Syncing Orders
- Extensibility of programmatic logic
- Opportunity name pre-population

thank you
